YES water is the by product and legacy of proton H in several accretion disks and galaxies included ours.

It's an atomic spectral concern can be understood with **gF values**, the common liquid water on Earth seems to be under these laws of spectroscopy- also consider that our galactic velocity is 270 km s⁻¹ and for our EARTH is 30 kms⁻¹, reentry on Earth is 7kms⁻¹.

We are still standing because gravity law,... We can enjoy of this law, and open the door of anti-gravity tools and range the chemicals rocket to scrap yard in two decades you can verify that I do not speak about chemical rockets of today but tools of tomorrow, in our website because for the moment disruptive one.

What is the market value of anti-gravity motors, with modify quantum Monte Carlo, it's possible to reach at **quintillion \$** or more ! but we have to ignore **space time** (as conventional concept) and take only OTi=1 as unitary tensor Time is structured with MEMONS page of the book quantum intronic medicine.

Time is considered as state of matter. It's a physical entity.

<https://silicon-g57.us/wp-content/uploads/2019/08/QIM-CDA-PDF-ENGLISH-082019-FINAL.pdf>

Some pages of interest p 35 to 55 p106 -109.

One part of the secret of quantum anti-gravity machine is the **DRIFT VELOCITY !**

We must be prepared to the great jump into the new physics, Einstein was correct, it was the basis , but the concept was limited to space time as conventional neuronal value and limited value of C 300,000 Kms-1 but universe laws do not care about our neuronal limits.

but it is another story.
